THE CLASSIC BORDO 6000 AS A COMBINATION LOCK

Goodbye keys: All you have to do is set a four-digit numerical code and you are ready to use your BORDO™ 6000C.

The BORDO™ 6000 has become a classic over many years - the clever design has won friends all over the world with its high level of security, flexibility and compact size. The 5 mm bars connected with specially designed drill resistant rivets can be folded down to a compact size, making for convenient transport.

The BORDO™ 6000C adds another member to the BORDO™ 6000 family. The C in the product name indicates that this is a combo lock with code. Is there need to worry that the numbers might wear off or fade over time? Not at all - the numbers are not printed. Instead, we produce the code dials from two durable components that guarantee long-term readability.

Technologies

- 5 mm bars with soft coating to protect bicycles paint finish.
- The bars and lock body are made of specially hardened steel
- Bars are connected by special drill resistant rivets
- Two-component code dials ensures long-lasting legibility
- Opening code can be set individually
- Incl. SH holder

Use and application

- Good protection for medium theft risk
